

PRODUCT SPECIFICATION

ITEM CODE: ABT-RO1915-600G

**DESCRIPTION: DIRECT FLOW RO 600GPD SYSTEM
WITH SMART FAUCET**

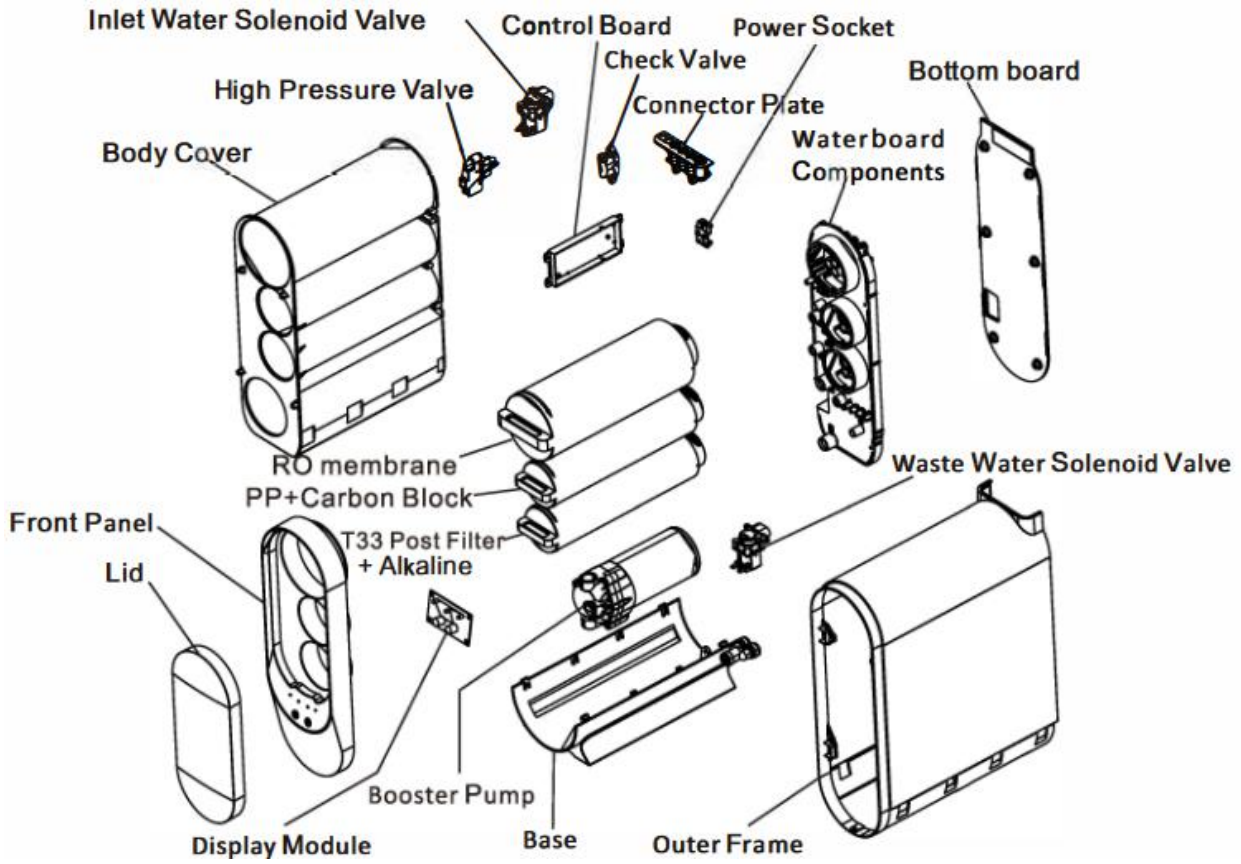

POWER: 220V-24VDC~50/60Hz

PARTS INTRODUCTION:

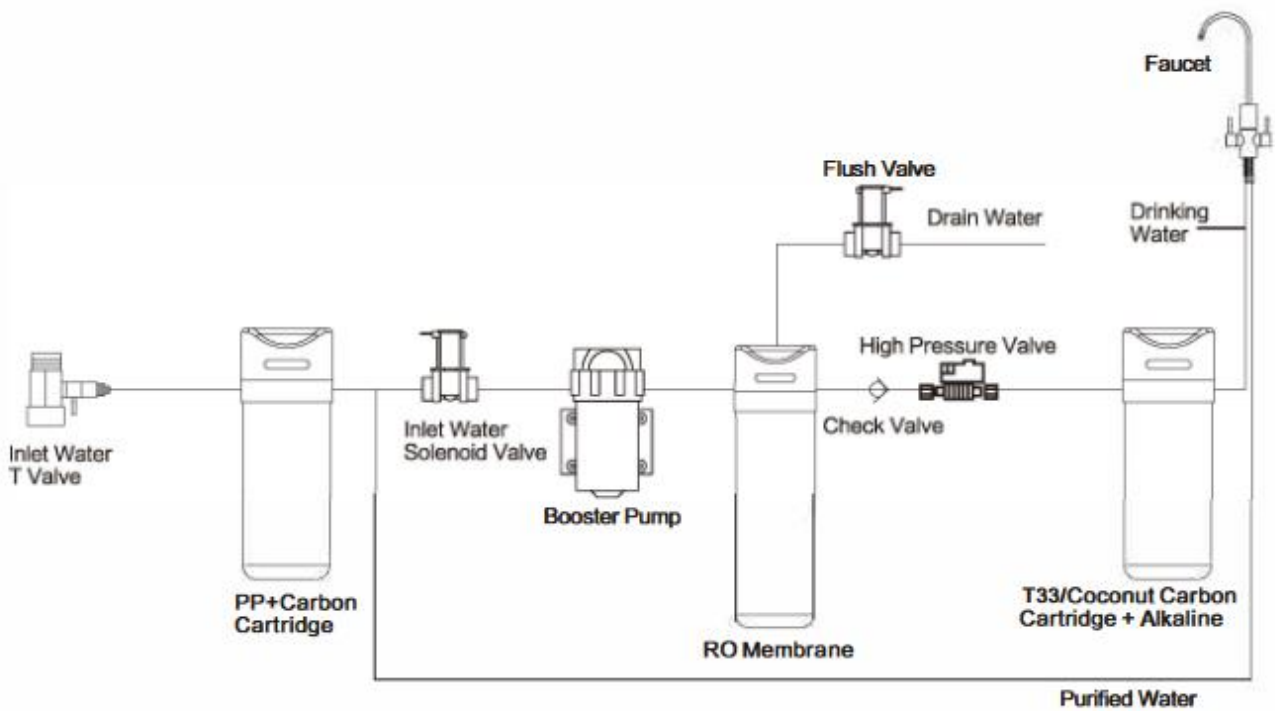

Filters: R.O Membrane

PP + Carbon Block

T33 Post Filter

FLOW CHART

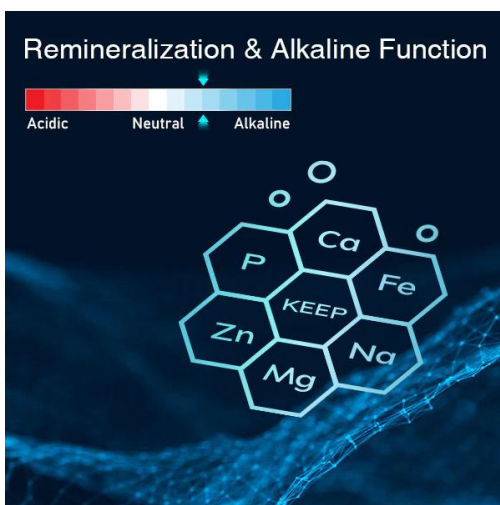

PRODUCT INTRODUCTION

SUPERIOR FILTRATION PERFORMANCE

Frizzlife PX500-A under sink tankless reverse osmosis water filtration system has a RO membrane (ASR313-500G) with precision at 0.0001 micron, which eliminates more than 1000+ kinds of contaminants (99.99%) from water including fluoride, chlorine, chloramine, TDS, limescale and lead & other heavy metals. The pre-filter (ASR311) greatly prolongs the service life of the RO membrane while the post-alkaline filter (ASR313-A) remineralizes the pure water.

Remineralization & Alkaline Function

One of the unique selling points of the RO system is the alkaline and remineralization function. It is one step beyond pure water only towards ultimate health in long term. Utilizing natural elemental tiny stones and particles, the post-filter imitates the mineral stones under the bottom of the spring lake, restoring essential minerals and alkalizing water pH to above 7.5.

Filter and Life Monitor

The color-coded indicators will remind you to change the filter cartridges in advance. Blue stands for good while red indicates a change of filter. The 1st (ASR311) is recommended to change per 6 months, while the 2nd RO membrane (ASR312) is recommended to replace per 2 years, and the 3rd (ASR313-A) stage is recommended to replace per year.

DIY Installation and Easy Change

The integrated unit can be installed within 30 min. The filters are super easy to change by a single twist!

- ① DIY installation
- ② Quick Guide, Online Video, User Manual
- ③ Twist to change

SMART FAUCET

How to check the screen:

When the faucet is on, these areas will be lighted on in bright to show TDS value. The logo "AQUAPRO" and "PPC, RO, T33" will be silk screened in white, and the 3 lights below the "PPC, RO, T33" will be lighted on in red for r reminder when the filter lifetime is coming to end for replacement.
