

PRODUCT SPECIFICATION

ITEM CODE: POLYRAY
DESCRIPTION: POLYRAY FILTER CARTRIDGE
BRAND: AQUAPRO

PRODUCT SPECIFICATION:

	DESCRIPTION:
Depth Filtration	Precisely Manufactured For Use In Critical Filtration Applications Within Food, Water Treatment & Other Demanding Process Industries.
High Dirt-Holding Capacity	Longer service life compared to surface-only filters, reducing replacement frequency.
Broad Chemical Compatibility	Used for precision micron filtration with a 0.22 micron, it can be used for almost anything.
Temperature Resistance	Capable of withstanding higher temperatures

PRODUCT SPECIFICATION

Features & benefits

- Low pressure drop
- High capacity and long service life
- Multi-layer structure
- Suitable for high temperature water

Technical Specifications

Micron Ratings	0.22μm
Filter Media	PP MICROFIBER
Lengths Available	10", 20" (custom lengths upon request)
Maximum Operating Temperature	up to 80 °C

Installation & Maintenance:

- Flush the System: Rinse new cartridges to remove any loose fibers or manufacturing debris before use.
- Check Seals: Ensure proper O-ring seating and housing seal to prevent bypass.
- Monitor Pressure: Replace the cartridge when the recommended pressure drop is reached or when flow is insufficient.
